Music Server

High Performance Music Servers

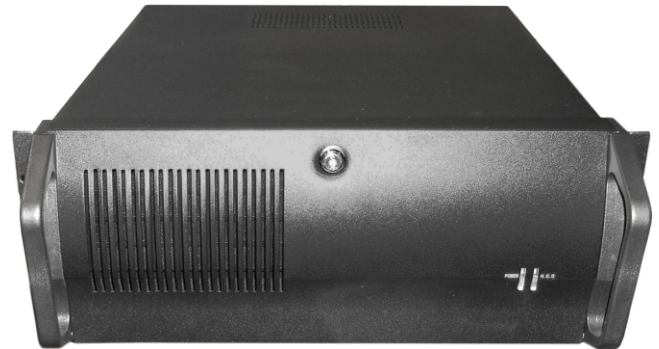

Custom Tailored For Your Application

MuSe™ Music Server is a high performance hard disk based music server for professional, commercial, industrial and high-end residential applications.

It is housed in a high quality 4RU industrial 19" rack mountable chassis with locking cover for security.

The unit is available pre-configured to serve up to 4 stereo channels simultaneously. The unit will play various digital audio formats including MP3 and WMA files. The music files can be accessed from the internal hard disc, from other drives on the network including any NAS (network attached storage). Music can be added from the DVD drive, network or USB.

Each channel can have many different play lists that can be scheduled to play at any time. The play lists can be activated based on time of day, day of week, month of year, or by specific dates and times. Silence periods can also be easily programmed throughout the day. Each play list can support thousands songs. Each play list has a built-in random play to prevent the same song from repeating again and also preventing a sequential play. Total autonomous operation means no supporting keyboard, mouse or video display are needed. Music can be loaded to the system hard drives via USB, DVD disc or Ethernet connection. Easy interface to the PADS™ products allows for music distribution in a commercial environment on CAT5 cables.

Special Features

Advanced Play List Scheduling

Activate based on time of day, day of week, month of year, or by specific dates and times and even silence periods

Channel Specific List Play

Designate a play list to a channel or multiple play lists to a channel or play the same list on all channels

Unlimited Play Lists and Capacity

Make as many play lists as you want and add as many songs as you want. Each play list can accommodate over 6000 songs.

Multiple Media Download Options

Load songs to your music server via DVD drive, USB port or network

Remote Access

Manage the MuSe from any computer any where in world

Multi Channel Output

Up to 4-channels, for custom applications

Tamper Resistant, Locking Front Panel

Front locking panel with key, to prevent damage and tampering

Applications

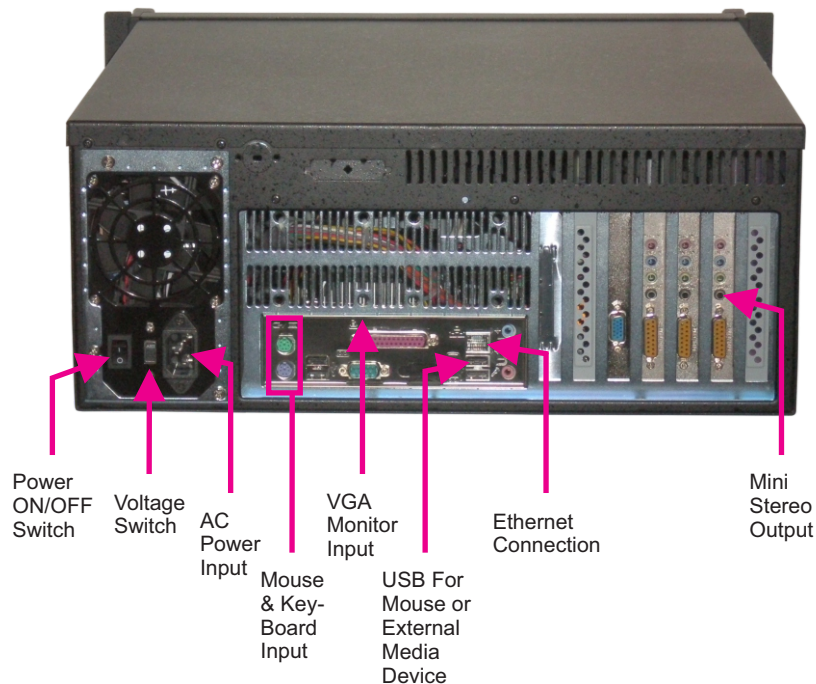

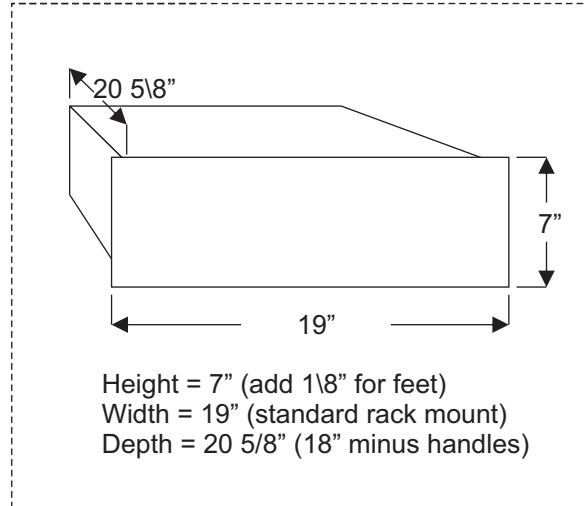

Hotels, Cruise Ships, Restaurants, Theme parks, Fitness Clubs, Museums, Shopping Malls, Department stores, multi-room audio applications in residential markets.
