

FOR IMMEDIATE RELEASE

The Best Kept Secret in Class-D, for Home and More

High Performance, High Efficiency and as Green as it Gets

Santa Clara, CA – 10/09/09 – Pragmatic Communications Systems, Inc. reveals their SAA-HideAways® Series class-D amplifiers - "The best kept secret in audiodom". The SAA series amplifiers deliver high-efficiency and audiophile sound quality up to 48-watts per-channel (stereo or mono) for use in home, commercial and pro applications. Additionally the SAA amplifiers 2.5" x 5.75" compact size allows them to Hide Away from site and they're very easy to install even for the beginner.

"The sound is very clean, dynamic and precise with a beautiful soundstage."
"Music is reproduced with great authority and ease, rhythm and pace are excellent, and it is also free of any distortion artifacts." Wim de Haan, AudioXpress, June 2009

High Efficiency Output

Pragmatic Communication Systems, Inc. has always made it its mission to introduce energy efficient and compact products into the market. There is no better example of that philosophy than the SAA amplifier, a 2-channel audiophile quality amplifier. SAA amplifiers produce a big, luxurious sound yet are so efficient that they don't require a heat sink or ventilating fan. The small yet powerful package delivers a true high fidelity performance that surpasses the quality of amplifiers ten times their size and weight. At only nine ounces they are by far the most compact and efficient amplifier in their class.

The SAA is another advancement in Pragmatic's HideAway™ series of audio components, which offers the most compact and efficient designs. SAA amplifiers house two separate mono-block amplifiers that provide extremely clean state-of-the-art power and produce unexpected sound depth and musical clarity. The SAA accepts any volume controlled line level stereo input and uses super quiet 12, 13.8 or 15V DC power. Advanced protection circuitry guards against system damage from overload, overheating, or short circuits.

Suprising Audiophile Sound Quality

Sound quality is comparable to the most reputable amplifiers on the market that cost in excess of 5000-dollars for less than 700. The full-range detail delivers with aplomb note after note day and night, never has 48-watts accomplished so much for so little. Detail is impeccable leaving no stone unturned and the loudness is unexpectedly usable and undistorted.

Compact and Simple

The SAA HideAway series amplifiers are housed in a black, brushed aluminum box measuring in at just 1.5" x 2.5" x 5.75", hence the name HideAway®. They use a regulated power supply which plugs into a standard power outlet and can be mounted, stashed or stuffed any where leaving application possibilities endless. Banana plugs are used for speaker outputs and inputs are available in standard line level or optional mini-stereo very simple and straight forward.

Applications

The SAA amplifiers are used in an array of applications such as custom home audio, pro-audio, commercial audio, lab testing and more.
